

Company With Quality System Certified
ISO 9001 / 2008

Member of CEAM Group

CEAM Control Equipment®

Instrument & Accessories Division

Since 1967

Reliable Partner for your Projects

Instrumentation:

Indicators - Controllers - Panel Configurable Programmers
Paper & Paperless Recorders
Acquisition Digital Modules Din-Rail
Electronics Signal Converters
4 to 20 mA transmitters for RTD & TC - Din Rail & T / C Din Head
Calibration Equipment - Calibrators - Ovens - Pumps

Communication Modules:

Communication Insulators & Gateway TCP-IP Ethernet-Serial RS485
Modem UMTS - HSDPA - 3 / 4G
Wifi Industrial Modules
Industrial switch

Protections & Utility:

Galvanic Isolators for Analog Signals mA Current Loop - Active & Passive
Power Surge and Lightning Protection
Power noise filters
Serial isolators
Electronic Power Supplies for Instruments and Loops

Portable Instruments:

Thermometers - Hygrometers - Pressure Gauges - Anemometers - Gasmeters - colourmeters
Combustion Analyzers
Data Loggers

Process Transmitters:

Temperature - Traditional Sensors & Infrared Pyrometry - Thermal Imagers
Relative Pressure - Differential - Barometric
Relative humidity
Flow Liquids & Gases
Level - Density - Viscosity
PH & Chemical Parameter
Gas concentration

Technical Services:

Specialist Technical Consultancy
Studio & Engineering of Special and Complete Solutions
Fast Delivery Service - Building and Parts Fast Shipping Within 24-48 H
Repair & Regeneration Tools

ISO Calibration (Executed for comparison) - Laboratory and Mobile Equipment for
ACCREDIA - SIT Calibration

Who Uses Our Products:

Foundries
Steel factories
Mechanical Industries

Glass Factories

Ceramic
Tiles
Terracotta
Bricks

Alimentary

Refrigeration

Waste Management
composting

Production of
Cement
lime
Chalk

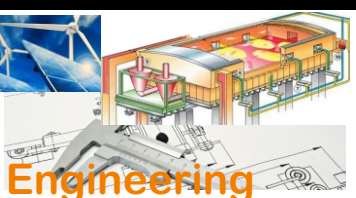

Acqueducts & Purifiers

Plastic and Rubber

Pharmaceutical

Engineering

Chemical Industry

Health & Research

Everywhere it is
necessary
Reliable
Accurate
Temperature
Sensors !!

VR18CR

900 Series

CPR144

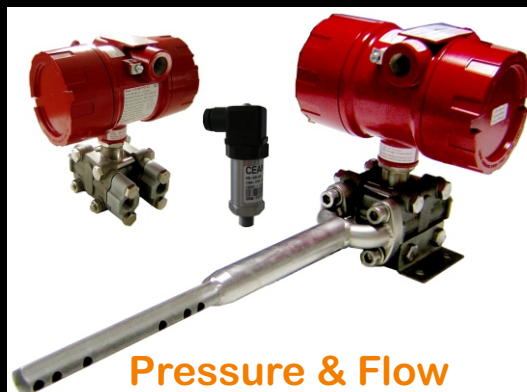

C90 Series
Piezometric Level

CLF
Series Level

Calibration Equipment

Pressure & Flow

CRPL Series
Radar Level

Real Company - Customer Support Concrete - Certified Quality
Production & Quick Delivery with FDS Fast Delivery Service - Delivery in 24-48H All Over the World

History & Mission

The Instrumentation division of CEAM Control Equipment, which we call internally LAB is the second historical roots of the group. Since the early sixties produce instruments initially intended mainly for glass and ceramics sectors, which are still very present among our customers, but over the years the production has been extended to the analog and digital electronics, and it enlarged and specialized to allow us to be present in all sectors, without exception, where it is necessary to rely on professional and reliable instruments, and a company structured in specific areas of expertise, that would be up the task and it is not as often it happens, a simple assembler of pieces taken at random on the market.

Today CEAM Control Equipment is a true reality, evolving continuously, structured, technological, projected into the future, so as to be able to export their products to Asia, provided by a certified quality system since the early nineties, by the Norwegian DNV, but above all it is a company that has been growing since its founding, investing in people and equipment innovation.

Over the years, a good part of corporate profits and never less than 30% have been reinvested in new equipment training, new technologies, and also in new companies or strategic investments, this is our simple little secret, that has allowed us to still be here with something to be said for the future.

The company, like all of the group, operates in property owned and primarily self-funded at 100%, this is the special condition that allows us today to produce real quality, no compromises, no tricks or loopholes.

Quality, overused word now, in CEAM is uncompromising and concreteness and to touch with your hands and perceive the spirit, it's enough just a visit to the company, in short, at a time of great uncertainty, we can say that we are a reliable partner, and today we think this is a primary value.

Certified Quality

Special Services

Professional Training Courses to the Choice, Use and Maintenance of Sensors

Possibility to develop structured ways of transversal courses over the area tools and systems

Specialized Technical Consultancy Service- Over 40 Years of Experience in Field

Support for the sensors selection, accessories and their positioning

Operational support to the resolution of operational issues and management of the sensors

Service of Repair & Regeneration of Instruments and Sensors

Direct repair of sensors with replacement of just the the damaged parts

Ricalibration and Reconfiguration

Verification Metrological Laboratory - Calibration - Calibration ISO - ACCREDIA

Sensors - Fixed and Portable Instruments - Metrological Whole Chains

The Variables: Temperature - Pressure - Humidity - Flow - Gas Analysis - Electrical signals

Internal Laboratory and Mobile Laboratory for Service in Customer Site (ISO Only)

Fast Delivery Service CFDS - Ceam® Fast Delivery Service

Production and fast delivery within the 24 - 48 H
